The Moon House

Pagosa Springs, CO

Silhouetted against a mountain backdrop that evokes an impressionistic painting, this clean European-influenced timber frame and architectural design combine regional influence and artisanal touches. The homeowner is an aesthete, and the home reflects her artistry in both its intent and functionality.

NEWENERGYWORKS.COM/THE-MOON-HOUSE

"I call if the moon house. With the windows and the openness of it, whether it's a full or new moon, it is just beautiful. It brings the starlight in, or it brings in the moonlight. It's spectacular at all times of day."

— HOMEOWNER

A Home for Healing

Pagosa Springs, CO

This expansive 35-acre mountain top estate spotlights poignant timber geometry with elevated viewing platforms of the San Juan mountains. The year-round hybrid timber frame is an embodiment of expedited collaboration, triumph over the homeowner's cancer battle, and enduring love.

NEWENERGYWORKS.COM/A-HOME-FOR-HEALING

"We have an entire view of the whole mountain range and it's absolutely gorgeous, it's our go to happy place. You can sit in the living room or outside on the porch and be completely at peace with yourself."

— HOLLIE ALEXANDER

Full Court Farmhouse

Hingham, MA

What looks like a working gambrel barn on the outside reveals a regulation basketball court on its interior. Functionality is key as this structure provides recreation as well as refined dinner parties. Dual porches and a loft offer outdoor gathering areas while the backlit custom timbers lend a contemporary appeal to a venerable form.

NEWENERGYWORKS.COM/FULL-COURT-FARMHOUSE

"Before construction the New Energy Works team is always very helpful to get a basic understanding of budget, performance, and character because there are lots of ways to frame a barn. They're very easy to work with as a company, do fabulous work in the field, and installations are always spectacular. They provide really, really, good CAD drawings that convey what the project is going to be like. So, we can understand it really well and the client understands it."

Lakeshore Artistry

Mancelona, MI

The elegant symmetry of this lakeside estate is the centerpiece of a legacy camp that will house generations of family and friends. Melding custom timbers and metalwork, the home celebrates both strength and warmth. Centered around a substantial stone fireplace and towering window wall, there are ample views of the water and woods waiting to be discovered in every nook in the house.

NEWENERGYWORKS.COM/LAKESHORE-ARTISTRY

"This will be a forever in the family, never sell it, generational longevity home. We'll be there forever. My kids love it and they're like, 'Mom, our kids are going to be here.' Which is why we built such a big place, because we knew what it was. As generations go on, everybody expands, and you need a lot of space."

Acadia National Park
GATEWAY CENTER

Trenton, ME

A stately entryway to Acadia National Park, this 11,000 square foot legacy building is the central hub for National Park travelers from all areas and walks of life. This heavy timber project was funded by private and public support and features 460 individual timbers and 85,000 board feet of material. Using traditional joinery, steel, large trusses, and a few custom-made eyebrow curve glulams; the up to 42' long timbers comprise expansive spans that provide the gateway building with a structure that equals the uniqueness of the park's surroundings.

NEWENERGYWORKS.COM/ACADIA-GATEWAY-CENTER

"[The Gateway Center] is one of the highlights of my 40-year career for sure, because it's been so long in the making. It's a complicated mix of partnerships and funding sources and efforts and things that had to be done to get it built."

— JOHN KELLY -MANAGEMENT ASSISTANT ACADIA NATIONAL PARK

Timber and Light

Sisters, OR

Crafted to complement its alpine surroundings, this custom timber frame melds architecture and nature. Spotlighting an elevated view of the surrounding Cascade Mountains, the home provides indoor and outdoor spaces to relax in elegance while basking in an abundance of sunlight.

NEWENERGYWORKS.COM/TIMBER-AND-LIGHT

"New Energy Works came in with the attitude of 'If there's a challenge, we are going to overcome it'. Jonathan and David were good to work with, modeling our home in 3D while figuring out the most elegant solutions."

Sun and Shade

Norwalk, CT

A custom timber framed pavilion & pergola, along with timbered beams inside the pool house, complete this exclusive stay-at-home vacation area. With an emphasis on comfort and high-craft amenities, this sybaritic outdoor space spotlights personalized timber finishes, bespoke aesthetics, and everyday functionality.

NEWENERGYWORKS.COM/SUN-AND-SHADE

"It was a good team; everyone coordinated well on the project, we were able to meet deadlines and produce the product that the customer wanted. Everybody had their roles, and we worked together well."

Great Lake Getaway

Huron, OH

This sophisticated poolside barn is one jewel in an expansive Great Lakes estate that includes a main home, carriage house, and pavilion. The space combines multiple functions including a garage, kitchen, bar, and refined gathering space. The painted timbers provide the interior with an open span as well as elegant detailing to complete the property's architectural ensemble.

NEWENERGYWORKS.COM/GREAT-LAKE-GETAWAY

"The barn was an outgrowth of the whole ensemble of the entire project. This was an entire estate on the lake that became a masterclass on a classic architecture that has an implied sense of history but was all new construction."

Wild Horse Ranch

Alvord Desert, OR

A structure as untamed as its name, the Wild Horse Ranch collaborative design is evident through thoughtful cathedral-inspired trusses.
The ornate functionality and recreationally-minded construction are tributes to the beloved horses that call the stables home.

NEWENERGYWORKS.COM/WILD-HORSE-RANCH

"A strong foundation of communication, collaboration, and trust is important on any project, but for legacy structures like the Wild Horse Ranch, it is fundamental to the success of the design. It is such an honor when clients place that kind of trust in us, and the results really show that."

Beyond the Water

Skaneateles, NY

A high-craft custom cabana that acts as a central hub of leisure for a lakeside estate. Designed with the intent of blending shoreline and poolside into a cohesive aggregate, this refined space is tailored for fun, sun, and waterfront avocation.

NEWENERGYWORKS.COM/BEYOND-THE-WATER

"On the practical side, New Energy Works is as professional as they get—they're on time and deliver and install the timbers with a high level of customer service. Equally important is that New Energy Works is sensitive to what we are trying to architecturally create and work closely to achieve what we are asking."

The Timberstead

Burdett, NY

An efficient and thoughtfully sized home designed to complement its Finger Lake pastoral hills and lily-pad pond setting. Featuring an abundance of wood including vertical PEFC-certified larch siding, reclaimed teak flooring, and custom finished Douglas Fir timbers, as well as an offsite-constructed enclosure system, this high-performance house highlights the beauty of wood, the homeowner's detailed material choices, and the property's natural beauty.

NEWENERGYWORKS.COM/THE-TIMBERSTEAD

"New Energy Works respected our design; they collaborated with us but didn't try to change what we wanted. They had a lot of respect for our vision...they were amazing."

Sunset Lodge

Indian Lake, NY

Mountain water, crackling fires, and custom timbers are the hallmarks of this legacy home in the heart of the central Adirondacks. High-craft geometry, tasteful tectonics, and North Country earth tones provide intentional detailing that lets this home stand alone as well as assimilate into its wilderness surroundings.

NEWENERGYWORKS.COM/SUNSET-LODGE

"Once we do something we're the type to do it at highest quality. I love curves and that's how we connected with New Energy Works. Balzer and Tuck knew that was their specialty, so we started to bring them into the whole design. It was an iterative process we enjoyed."

Spruce Roost

Inlet, NY

Combining classic Adirondack aesthetics with light industrial touches, this lakeside home acts as both a comfortable cabin and a stately mountain chateau. The great room features an elevated vista of Sixth Lake supported by sturdy hammer beams and curved braces. A two-level timber porch area encourages open air gathering while providing high-craft coverage from inclement mountain weather.

NEWENERGYWORKS.COM/SPRUCE-ROOST

"To sit here in the great room and to look out the windows and see the view and to appreciate the timber framing it looks seamless. It's like it's one piece going from the great room and out onto the deck, it's hard to describe, it's really spectacular."

— JANET CARDELLA

What We Do

Timber Framing

This is our genesis and our heart. We have spent four decades building a balance of craft, efficiency, and engineering. Our focus is on delivering the best timber frame in the industry. Deliver is the key word.
The craftspeople who fabricate your posts and beams are also those who raise them anywhere in the United States.

High Performance Enclosures

With our 30+ years of sustainable building & manufacturing history, we have developed a unique insight into off-site panelization that has inspired us to help others build to a high level of performance.
We partner with architects and builders to evaluate the schematic designs of a project and optimize them for off-site fabrication, resulting in the ability to execute resilient passive houses and high-performance buildings.

Mass Timber + Glulam

Partnering with architects and builders around the country to incorporate mass timber into their projects is our specialty. Whether we are crafting curved glulams for a residential timber frame home, manufacturing and installing commercial glulams for industrial spaces, or sequencing and raising Cross Laminated Timbers (CLTs) our crew of craftspeople work to make your project go smoothly from start to finish.

Design

It all starts here. Whether you are the designer or architect, bring us your professional design, or hire us to do it for you. Your project is very important, your program very unique to you.

Build

High craft construction is in our DNA. We have over 30 years of General Contracting experience in a diverse range of projects. This is our joy, and more importantly, a continual education by instituting new technologies, learning improved job management, and – you bet it – understanding smart and challenging clients. We incorporate all of this into our work, and you benefit at whatever level of build you need us for.

Fine Woodworking

We call this group NEW*woodworks*, and for more than 20 years these craftspeople have developed and fabricated the finest and most challenging cabinetry, doors, stairs, and furniture. It was a natural evolution, bringing in these consistently in-demand skills for our projects clients.

Pioneer Millworks

For more than 30 years our sister company Pioneer Millworks has been inspired to develop creative reclaimed and sustainable wood flooring, paneling, decking, and siding from their East and West Coast mills. They offer several species, grades, textures, and color options for architects and designers that are easy for builders to install and have a story that homeowners can connect with. Most importantly they provide natural building material options that are healthy for people and our planet.

"I can't tell you how nice it is to see a team that works together as a unit, is clean, and respects the safety aspect of what we're doing. Oh yeah, and builds an awesome building!"

— MARK PHISTER, ROCKFORD CONSTRUCTION

"There's no doubt that New Energy Works is a step above other heavy timber companies. Their communication and ability to share sketches for us to use early on allows us to nip issues in the bud. To have New Energy Works say, 'Yeah, it can work and here's how,' makes for a good partnership."

— BRETT BALZER AIA, BALZER AND TUCK ARCHITECTURE

"The collaboration with New Energy Works went really well. They stayed on the timeline and processes were smooth. It was easy to get on touch with the team and go back and forth with ideas—especially when we got to the important step of finalizing timber finish & color."

— AMORY SUSCO, BUILDER, 2 GUYS AND A HAMMER

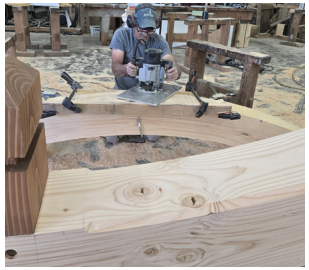

"New Energy Works couldn't have been easier to work with. They collaborated so well with our builder— there was just harmony between the two of them."

— THE STEIGER'S, HOMEOWNERS

The Beauties of Wood

When we say that one of our core tenets is The Beauties of Wood, the plural is intentional.

There is so much to love about wood as a building material. The flowing grains, graceful curves, and dynamic range of adaptable colors that make wood visually stunning, but there is far more to wood than meets the eye.

Let us tell you a little more about how wood works, and what makes it so special to us.
